For an International Star Party!

OCTOBER 22—24 2009

400 YEARS to the day, Galileo's telescopic observations of the Moon

revolutionized our view of the Universe. On October 22—24, the public will once again be turning their attention to the heavens, during Galilean Nights: the largest astronomical event in history.

Be part of Galilean Nights. The Village of Barrington Hills and the Barrington Area Library are co-sponsoring a **STAR PARTY** on **Saturday, October 25, 2009, 6-9 PM.**

With or without a telescope, enjoy the camaraderie with local members of the Northwest Suburban Astronomers. See the moon, double stars, satellites and all the night sky has to offer for free.
