Subject: IML Local Revenue Preservation Packet

To: Municipal Official Addressed

From: Illinois Municipal League

The Illinois Municipal League has prepared a "Local Revenue Preservation Packet" for use in building opposition to any attempt by the General Assembly and Governor to reduce state-collected local government revenues. Our members are strongly encouraged to use these materials immediately. These materials include basic facts and trends concerning state-collected local government revenues, a calculator to determine the financial impact of revenue reductions for each community, as well as a model resolution, press release and letters that can be used in their current form or modified accordingly. These materials can be accessed via the IML website.
