Re: Helm Road Gas Main Installation
Nicor- Account 65-29-63-4656

Dear Mr. Abboud:

Our office has reviewed the attached quotation from Nicor Gas in the amount of \$9,045.92. Representatives with Nicor Gas have been in contact with residents along Helm Road to extend a gas main to an area that currently does not have natural gas service. Typical gas main installation via standard trench installation in the parkway would not require reimbursement by the Village. However, the location of the proposed main extension would require extensive tree and brush removal along the north side of Helm Road if completed via standard trench installation.

Our office met with Nicor onsite in March and in consultation with the Village Administrator established two potential options to avoid significant impacts to trees and vegetation along the roadway. The first option would be a trench installation in the roadway, for which the Village would be responsible for the costs of patching upon completion. The anticipated cost for that patching based on the length of the trench would be over \$10,000. The second option was to directionally bore the proposed gas main, which carries an additional cost of \$9,045.92 as noted in the quote from Nicor Gas. Upon review of the options, it was requested that Nicor pursue the option to directionally bore the main.

Similar to other utilities, Nicor requires payment prior to completion of the work. We recommend that payment be made directly to Nicor Gas in the amount of \$9,045.92.

Sincerely,
Gewalt Hamilton Associates

Daniel J. Strahan, P.E., CFM
Assistant Village Engineer

Work to be done on: Nicor Gas facilities Customer-owned facilities Mains Services Metering facilities Fuel line Other _____

Nicor Gas is not responsible for restoration of landscaping/paving on private property.

The sketch, if any, appearing on the reverse side hereof, or attached hereto, is hereby made a part of this Proposal/Contract. Work will be done during regular working hours except upon the Customer's/Contractor's specific request and agreement to pay for overtime work. All material and equipment from the main to and including the meter is the property of the Company. All material and equipment beyond the meter is the property of the Utility Customer and is to be maintained and repaired at the Utility Customer's expense.

Except in case of emergency, no repairs chargeable to the Utility Customer shall be made other than upon the Utility Customer's written order. The Utility Customer agrees that the Company shall have the right to enter the Utility Customer's premises at all reasonable hours to make the necessary repairs to piping, regulators, meters and other equipment connected to the Company's system.

The Company shall not be responsible for any damages resulting from delay in completing the above work, where such delay is due to casualties, labor disputes, or other causes beyond the reasonable control of the Company. The Customer/Contractor agrees to indemnify and hold harmless the Company against all costs, damages, liabilities and expenses (including those incurred in connection with any claim, suit or proceeding) arising out of the Work, except when such costs, damages, liabilities and expenses arise solely from the negligence of the Company.

This Proposal shall be void unless accepted within 30 days of its presentment. This Proposal contains the entire understanding between the parties with respect to the subject matter hereof, and may be modified, amended or mutually rescinded only by a written instrument executed by the parties hereto. This proposal, as submitted, becomes a Contract when accepted by the Customer/Contractor and approved by the Company.
